Three dimensional art

This design of panel is more than an acoustic enhancement- it is a piece of three-dimensional art.

Adding a distinct visual appeal to any room, this panel is suitable for both work and play areas as with most of our panels.

Strip-like ridges like pipes running along the wall add fun and highly striking optical interest to places whilst disguising the panels true intent.

KEY FEATURES & BENEFITS

- Soundtect acoustic panels offer design options that are unusual and stand out, giving designers more choice and flexibility for acoustic applications.
- Reverberation is reduced by offering Class A absorption to increase speech intelligibility in a specific area while reducing background sound noise levels.
- Soundtect panels are for indoor use only but can be used in any area that acoustic treatments are required including areas of high levels of humidity such as swimming pools.
- The panels are easily wall mounted and absorb sound and enhance sound quality.
