

Pattern creating movement as well as function

In a fusion of geometry and raised spheres. Tetris combines art with function in this fascinating wall ensemble, easily adapting to both residential and commercial settings.

Different colour finishes and the option to paint your own colour, makes them versatile enough to be used in any environment from schools to offices.

This design like all our panels, absorbs sound, provides reverberation balance and is simply designed to create a more pleasing environment.

KEY FEATURES & BENEFITS

- Soundtect acoustic panels offer design options that are unusual and stand out, giving designers more choice and flexibility for acoustic applications.
- Reverberation is reduced by offering Class A absorption to increase speech intelligibility in a specific area while reducing background sound noise levels.
- Soundtect panels are for indoor use only but can be used in any area that acoustic treatments are required including areas of high levels of humidity such as swimming pools.
- The panels are easily wall mounted and can be used to create floating ceilings that absorb sound and enhance sound quality.
